## **Anticapitalist May Day 2023:**

### ***Enough with exploitation and oppression, popular resistance!***

Contrary to what we have been led to believe, the post-pandemic world is still as unequal, unjust, violent and ugly as the one we lived in before. We experience the horrors of capitalism every day, and we see firsthand all the damage it does to our lives, to our communities, to our environment, and to the world in general. Rent, housing and transportation costs are rising while our wages and working conditions are stagnating or declining. In addition, the far right is gaining power, the planet continues to burn, police continue to intimidate and kill racialized people with impunity, and bloody conflicts like the war in Ukraine are raging around the globe. Enough is enough! Let's say "no" to all these horrors! Let's demonstrate together our anger against the capitalist system on May 1st for the international workers' day!

If we are poor, if there are constant crises, if the climate is out of control, it is because we are exploited and dominated by a minority of ultra-rich people who act for one purpose only: their profit. Every hour we work, every month's rent we pay, every grocery run we do, we enrich these parasites who ruin our lives and destroy the planet. While we work to exhaustion, while we count our pennies to make ends meet, while we live in constant insecurity, the bosses, the big landlords and all those who steal from us are swimming peacefully in abundance.

Let's not remain silent and powerless in front of all these injustices, let's not limit ourselves to insufficient demands. The government will not come to our rescue. Instead of reducing mildly our ills and negotiating to our disadvantage our impoverishment, let's demand a world where we would like to live, and let's work to make it happen! Let's expropriate the capitalists for good and reclaim what is ours, let's take back control over production and the fruits of our labor! Let's put an end to the abuses of our greedy landlords, let's manage our homes and our living spaces ourselves! Let's put an end to the obscene inequalities of wealth that the capitalist system allows, let's distribute the goods and the collective wealth according to the needs of each person!

Because we are tired of being plunged into precarity, of seeing ourselves sink into despair, of seeing our loved ones suffer to enrich the rich, let's revolt! Let's put an end to the bourgeois violence that crushes us, suffocates us and bludgeons us: on May 1st, let's go out in the street, let's stand up, let's move forward and let's not give up an inch to the police.

**Long live the revolt! Down with exploitation and oppression!**
