Since 1947, the Palestinian people have been fighting against the occupation and colonization of their land by the Zionist entity ("Israel"). Gaza's resistance reached its peak on October 7, 2023, in a forceful strike. The Zionist entity seized this opportunity to accelerate its genocidal policies and practices against the Palestinian people, with the complicity of its allies. For two years, Palestinians in Gaza have been deliberately bombed and starved by the Zionist entity, fighting to survive while continuing to resist!

Meanwhile, the governments, including so-called Canada make meaningless declarations and support the Zionist entity militarily, politically and financially.

Let us bring our governments face to face with the insignificance of their actions as well as with their active complicity! Let us target the war profiteers, wherever they stand in the vast web of complicity: whether they provide arms, artificial intelligence tools, pension funds or investment services! Actions are multiplying: demonstrations, encampments, graffiti, occupations, disruptions, sabotage actions, flotillas, caravans, and global marches to break the blockade. Let us continue our actions to put an end to the ongoing genocide and support the Palestinian people in their liberation struggle for justice and dignity!

From October 6 to 12th 2025, D4P and CLAC invite all to organize aiming to provoke, disturb and disrupt to make clear our refusal of the complicity with the genocide and remind all that resistance is legitimate, in all its shapes, in Palestine and here!

in Palestine and everywhere else

Resistance persists!

Since 1947, the Palestinian people fight against the occupation and colonization of its land by the Israeli Zionist entity. While

Gaza was under siege for the last 20 years, its resistance culminated on October 7th 2023 in a powerful blow. The Zionist entity used to opportunity to accelerate its genocidal policies and attacks. Palestinians in Gaza are fighting to survive, but what's really inspiring, is that they also continue their resistance.

Meanwhile, the governments, including so-called Canada make meaningless declarations and support the Zionist entity militarily, politically and financially.

Let's confront our governments, the insignificance of their action and its active complicity. Let's target war profiteers: whether they produce weapons or artificial intelligence tools, even if they finance the genocide like the pension plans managers and investment services. Actions are already multiplying: demonstrations, encampments, occupations, actions of economic disruption and sabotage, flotillas, caravans and worldwide marches to break the blocus. Continue our action to end the ongoing genocide and support the Palestinian people in its struggle for freedom!

From October 6 to 12th 2025, D4P and CLAC invite all to organize aiming to provoke, disturb and disrupt to make clear our refusal of the complicity with the genocide and remind all that resistance is legitimate, in all its shapes, in Palestine and here!
